

# DUCT TEST AND REPAIR REBATE PROGRAM

## Contractor Terms and Conditions Agreement

1. To qualify for a Duct Test and Repair Rebate, the installing contractor must:
  - a. Be licensed in Arizona.
  - b. Have an on-site technician certified by the BPI as a "Building Analyst."
  - c. Complete the Contractor Information and Equipment Information sections of the rebate application.
  - d. Sign the Program Compliance section of the rebate application.
  - e. Perform work in accordance with National Renewable Energy Laboratory standard duct-sealing work specifications ([sws.nrel.gov/spec/31602](https://www.nrel.gov/spec/31602)).
  - f. Be in good standing with all other SRP rebate programs and their requirements to be eligible to participate in the Duct Test and Repair Rebate Program.
  - g. Meet the requirements for each duct seal and repair.
2. Failure to provide any of the required information, including signatures, will result in the return of the rebate application.
3. SRP reserves the right to inspect the repairs for compliance with the program requirements. If the repairs are selected for an inspection, the rebate will be withheld pending the outcome of the inspection. If the repairs are found to be in compliance, the rebate will be paid. If the repairs are not in compliance, the customer and contractor will be notified. To qualify for the rebate, the customer is responsible for negotiating with the contractor to bring the repairs into compliance. A reinspection using SRP's authorized inspectors must be completed and submitted to SRP. The contractor is responsible for the expense of a reinspection. SRP will process the application after receiving the reinspection documentation.
4. Program procedures, requirements and rebate levels are subject to change or cancellation without notice.
5. This program is for inspection and repair of existing systems only.
6. Any contractors using an aerosol sealant for testing and subsequent sealing of identified leaks must include supply ducts, return ducts and the air handler.
7. One rebate check will be issued per approved application to the person listed as the customer of record on the SRP account (limit five per customer). If the customer agrees to release the rebate to the contractor, the contractor will receive the rebate.
8. SRP makes no representations and provides no warranty or guarantee with respect to the design, manufacture, construction, safety, performance or effectiveness of the newly installed equipment, including any warranties of merchantability or fitness for a particular purpose. Responsibility for delivery and workmanship related to any equipment or services the customer procures exclusively rests with the contractor selected by the customer. Responsibility for supervision of the contractor to ensure the contractor complies with the requirements of the SRP Duct Test and Repair Rebate Program rests with the customer. SRP assumes no responsibility for oversight of contractor services.
9. The Terms and Conditions set forth herein constitute a complete statement of the Terms and Conditions applicable to this promotion and supersede all prior representations or understandings, whether written or oral. SRP shall not be bound by or be liable for any statement, representation, promise, inducement or understanding of any kind that is not set forth herein. SRP reserves the right to change or cancel this promotion or its Terms and Conditions at any time.

\*Contractors may recommend increasing and adding additional return air ducts before sealing ducts. Homeowners who decline a contractor's recommendation to properly size the duct system prior to duct sealing may reduce the air-conditioning system's cooling capacity, and this could cause energy costs to increase.

By signing this application, the contractor certifies that the information above is correct and that the work has been performed in an acceptable manner.
