September 5, 2023

Dear John,

Thank you for your inquiry concerning SRP's proposed Buy-Through Program. SRP has posted detailed information regarding its Buy-through Program on its website, available at this link: [Buy-Through Program](#). Here you will find documents and materials including:

Buy-Through program overview
Buy-Through program design - Updated 8/4/2023
Buy-Through program requirements - Updated 8/7/2023

The design of SRP's proposed Buy-Through Program contemplates that the energy supplied by the GSP will match the customer's participating load on a 24x7 basis, with the exception of minor imbalances that may occur. If a GSP were to provide only a partial day supply, the resulting imbalances would likely make program participation unworkable for the customer. Please refer to the provisions on imbalance service in the Program Design and the Program Requirements documents. Also note that a GSP must be a member of WSPP and provide firm capacity/energy sale or exchange service under WSPP Service Schedule C.

If SRP issues an RFP for new generation resources of a type developed by Origis Energy, SRP encourages Origis Energy to submit a proposal.

Sincerely,

A handwritten signature in blue ink that reads "Adam Peterson". The signature is written in a cursive, flowing style.
