## **CEP Regulatory Process and Timeline**

STEP 1	STEP 2	STEP 3	STEP 4	STEP 5	STEP 6	STEP 7
SRP conducts an environmental review and analysis to prepare the CEC application.	SRP coordinates with affected agencies and jurisdictions to gather and share data.*	SRP informs stakeholders and the public about the project and process and solicits input and feedback.	Thirty to sixty days after filing the CEC application, a public hearing is held. During this multiday public hearing, held near the project site, the Arizona Power Plant and Transmission Line Siting Committee evaluates the submitted CEC application.	The Arizona Power Plant and Transmission Line Siting Committee makes a decision on whether to issue a CEC for the project. The CEC is referred to the ACC.	The ACC holds an open meeting a minimum of 30 days after the siting committee's hearing to affirm, deny or modify the CEC.	Upon affirmation by the ACC, the proposed project can commence construction.

<sup>\*</sup>For the Coolidge Expansion Project (CEP), these entities include the Arizona Department of Environmental Quality, the Arizona Game and Fish Department, the State Historic Preservation Office, Pinal County and the City of Coolidge.
