

Sandra Kennedy Comments

Subject: Recommendations

As per our conversation, here are my recommendations.

1. Super off peak rate for schools
2. Create Tariffs for
 - Low income/No income
 - Veterans/Veteran spouses
 - Houses of Worship
3. Do away with Demand charges for Solar customers
4. Peak hours 4pm to 7pm
5. Create a Pricing Comparison tool and list it on the bill for the first year after the implementation of rate hike. Place on website for customers to utilize.
6. Create an explicit Tariff for DATA CENTERS (they should bare the cost for their usage)
7. Wildfire 2 tier proposal
8. PLEASE CREATE A DOCKET SYSTEM SO THAT THE PROCESS BECOMES USER FRIENDLY!
9. Create Energy Efficiency and Conservation measures with incentives

Thank you for your assistance.
