## **Sandra Kennedy Comments**

**Subject:** Recommendations

As per our conversation, here are my recommendations.

- 1. Super off peak rate for schools
- 2. Create Tariffs for Low income/No income Veterans/Veteran spouses Houses of Worship
- 3. Do away with Demand charges for Solar customers
- 4. Peak hours 4pm to 7pm
- 5. Create a Pricing Comparison tool and list it on the bill for the first year after the implementation of rate hike. Place on website for customers to utilize.
- 6. Create an explicit Tariff for DATA CENTERS (they should bare the cost for their usage)
- 7. Wildfire 2 tier proposal
- 8. PLEASE CREATE A DOCKET SYSTEM SO THAT THE PROCESS BECOMES USER FRIENDLY!
- 9. Create Energy Efficiency and Conservation measures with incentives

Thank you for your assistance.
